ACGME Program Requirements for Graduate Medical Education in Infectious Disease

Common Program Requirements (Fellowship) are in BOLD

Where applicable, text in italics describes the underlying philosophy of the requirements in that section. These philosophic statements are not program requirements and are therefore not citable.

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

Introduction

Int.A.

Fellowship is advanced graduate medical education beyond a core residency program for physicians who desire to enter more specialized practice. Fellowship-trained physicians serve the public by providing subspecialty care, which may also include core medical care, acting as a community resource for expertise in their field, creating and integrating new knowledge into practice, and educating future generations of physicians. Graduate medical education values the strength that a diverse group of physicians brings to medical care.

Fellows who have completed residency are able to practice independently in their core specialty. The prior medical experience and expertise of fellows distinguish them from physicians entering into residency training. The fellow's care of patients within the subspecialty is undertaken with appropriate faculty supervision and conditional independence. Faculty members serve as role models of excellence, compassion, professionalism, and scholarship. The fellow develops deep medical knowledge, patient care skills, and expertise applicable to their focused area of practice. Fellowship is an intensive program of subspecialty clinical and didactic education that focuses on the multidisciplinary care of patients. Fellowship education is often physically, emotionally, and intellectually demanding, and occurs in a variety of clinical learning environments committed to graduate medical education and the well-being of patients, residents, fellows, faculty members, students, and all members of the health care team.

In addition to clinical education, many fellowship programs advance fellows' skills as physician-scientists. While the ability to create new knowledge within medicine is not exclusive to fellowship-educated physicians, the fellowship experience expands a physician's abilities to pursue hypothesis-driven scientific inquiry that results in contributions to the medical literature and patient care. Beyond the clinical subspecialty expertise achieved, fellows develop mentored relationships built on an infrastructure that promotes collaborative research.

Int.B. Definition of Subspecialty

I.B.1.a)

Infectious disease medicine is the subspecialty of internal medicine that focuses on diagnosing and managing infections.

Int.C. Length of Educational Program

The educational program in infectious disease must be 24 months in length. (Core)*

I. Oversight

I.A. Sponsoring Institution

The Sponsoring Institution is the organization or entity that assumes the ultimate financial and academic responsibility for a program of graduate medical education consistent with the ACGME Institutional Requirements.

When the Sponsoring Institution is not a rotation site for the program, the most commonly utilized site of clinical activity for the program is the primary clinical site.

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

I.A.1.	The program must be sponsored by one ACGME-accredited Sponsoring Institution. (Core)*
I.B.	Participating Sites

A participating site is an organization providing educational experiences or educational assignments/rotations for fellows.

An infectious disease fellowship must function as an integral part

I.B.1.	The program, with approval of its Sponsoring Institution, must
	designate a primary clinical site. (Core)

	of an ACGME-accredited program in internal medicine. (Core)
IB1b)	The Sponsoring Institution must establish the infectious disease

The Sponsoring Institution must establish the infectious disease fellowship within a department of internal medicine or an administrative unit whose primary mission is the advancement of internal medicine subspecialty education and patient care. (Detail)

I.B.1.c) The Sponsoring Institution must ensure that there is a reporting relationship with the program director of the internal medicine

90		residency program to ensure compliance with the ACGME
91 92		accreditation requirements. (Core)
93	I.B.2.	There must be a program letter of agreement (PLA) between the
94	1.0.2.	program and each participating site that governs the relationship
95		between the program and the participating site providing a required
96		assignment. (Core)
97		
98	I.B.2.a)	The PLA must:
99	LD 0 -> (4)	ha was a seed of land a seem 40 seems and (Core)
100 101	I.B.2.a).(1)	be renewed at least every 10 years; and, ^(Core)
101	I.B.2.a).(2)	be approved by the designated institutional official
103		(DIO). (Core)
104		•
105	I.B.3.	The program must monitor the clinical learning and working
106		environment at all participating sites. (Core)
107	LD 0 -\	A4
108 109	I.B.3.a)	At each participating site there must be one faculty member, designated by the program director, who is accountable for
110		fellow education for that site, in collaboration with the
111		program director. (Core)
112		I

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

114 I.B.4. The program director must submit any additions or deletions of
 115 participating sites routinely providing an educational experience,
 116 required for all fellows, of one month full time equivalent (FTE) or

more through the ACGME's Accreditation Data System (ADS). (Core)

113

119	I.C.	The program, in partnership with its Sponsoring Institution, must engage in
120		practices that focus on mission-driven, ongoing, systematic recruitment
121		and retention of a diverse and inclusive workforce of residents (if present),
122		fellows, faculty members, senior administrative staff members, and other
123		relevant members of its academic community. (Core)
124		·

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

	as noted i	11 4.0.1.0).(0).
125		December
126 127	I.D.	Resources
127 128 129 130 131	I.D.1.	The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education. (Core)
132 133	I.D.1.a)	Space and Equipment
134 135 136 137		There must be space and equipment for the program, including meeting rooms, examination rooms, computers, visual and other educational aids, and work/study space. (Core)
137 138 139	I.D.1.b)	Facilities
140 141 142 143	I.D.1.b).(1)	Inpatient and outpatient systems must be in place to prevent fellows from performing routine clerical functions, such as scheduling tests and appointments, and retrieving records and letters. (Detail)
144 145 146 147 148	I.D.1.b).(2)	The Sponsoring Institution must provide the broad range of facilities and clinical support services required to provide comprehensive care of adult patients. (Core)
149 150 151	I.D.1.b).(3)	Fellows must have access to a lounge facility during assigned duty hours. (Detail)
151 152 153 154 155	I.D.1.b).(4)	When fellows are in the hospital, assigned night duty, or called in from home, they must be provided with a secure space for their belongings. (Detail)
156 157 158 159 160	I.D.1.b).(5)	Fellows must have convenient access to a laboratory for clinical microbiology, such that direct and frequent interaction with microbiology laboratory personnel is readily available. (Core)
161 162 163	I.D.1.b).(6)	Facilities for the isolation of patients with infectious diseases must be available. (Core)

164	I.D.1.c)	Other Support Services
165 166 167 168 169 170		It is suggested that clinical education be conducted in settings that also have ACGME-accredited programs in general surgery, obstetrics and gynecology, pediatrics, and other medical and surgical subspecialties. (Detail)
171	I.D.1.d)	Medical Records
172 173 174 175 176 177		Access to an electronic health record should be provided. In the absence of an existing electronic health record, institutions must demonstrate institutional commitment to its development and progress toward its implementation. (Core)
178 179 180 181	I.D.2.	The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote fellow well-being and provide for: (Core)
182 183	I.D.2.a)	access to food while on duty; (Core)
184 185 186 187	I.D.2.b)	safe, quiet, clean, and private sleep/rest facilities available and accessible for fellows with proximity appropriate for safe patient care; (Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care; (Core)

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

I.D.2.d) security and safety measures appropriate to the participating site; and, (Core) accommodations for fellows with disabilities consistent with the Sponsoring Institution's policy. (Core)

199		
200	I.D.3.	Fellows must have ready access to subspecialty-specific and other
201		appropriate reference material in print or electronic format. This
202		must include access to electronic medical literature databases with
203		full text capabilities. (Core)
204		
205	I.D.4.	The program's educational and clinical resources must be adequate
206		to support the number of fellows appointed to the program. (Core)
207		
208	I.D.4.a)	Patient Population
209	,	
210	I.D.4.a).(1)	The patient population must have a variety of clinical
211		problems and stages of diseases. (Core)
212		
213	I.D.4.a).(2)	There must be patients of each gender, with a broad age
214		range, including geriatric patients. (Core)
215		
216	I.D.4.a).(3)	A sufficient number of patients must be available to enable
217		each fellow to achieve the required educational outcomes.
218		(Core)
219		
220	I.E.	A fellowship program usually occurs in the context of many learners and
221		other care providers and limited clinical resources. It should be structured
222		to optimize education for all learners present.
223		
224	I.E.1.	Fellows should contribute to the education of residents in core
225		programs, if present. ^(Core)
226		

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

228 II. Personnel 229 230 II.A. **Program Director** 231 232 II.A.1. There must be one faculty member appointed as program director with authority and accountability for the overall program, including 233 234 compliance with all applicable program requirements. (Core) 235 The Sponsoring Institution's Graduate Medical Education 236 II.A.1.a) 237 Committee (GMEC) must approve a change in program director. (Core) 238 239 240 II.A.1.b) Final approval of the program director resides with the 241

Review Committee. (Core)

227

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.

243 244

II.A.2. The program director and, as applicable, the program's leadership team, must be provided with support adequate for administration of the program based upon its size and configuration. (Core)

246247248

249

245

II.A.2.a) At a minimum, the program director must be provided with the salary support required to devote 20-50 percent FTE of non-clinical time to the administration of the program. (Core)

250251252

At a minimum, the program director must be provided with the dedicated time and support specified below for administration of the program: (Core)

254255

253

Number of Approved	Minimum Support
Fellow Positions	Required (FTE)
<u><7</u>	<u>.2</u>
<u>7-9</u>	<u>.25</u>
<u>10-12</u>	<u>.3</u>
<u>13-15</u>	<u>.35</u>
<u>16-18</u>	<u>.4</u>
<u>19-21</u>	<u>.45</u>
<u>>21</u>	<u>.5</u>

256

261 262

257 II.A.2.b) 258 259 260 Programs must appoint at least one of the subspecialty-certified core faculty members to be associate program director(s). The associate program directors(s) must be provided with support equal to a dedicated minimum time for administration of the program as follows: (Core)

Number of Approved	Minimum Support
Fellow Positions	Required (FTE)
<u><7</u>	<u>0</u>
<u>7-9</u>	<u>.13</u>
<u>10-12</u>	<u>.14</u>
<u>13-15</u>	<u>.15</u>
<u>16-18</u>	<u>.16</u>
<u>19-21</u>	<u>.17</u>
<u>22-24</u>	<u>.18</u>
<u>25-27</u>	<u>.24</u>

263

Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to

sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in fellow education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

264

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 30 percent FTE support for the Program Director and at least 14 percent FTE support for the associate program director(s). Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE. Further, the Review Committee allows the minimum required FTE support to be shared among multiple associate program directors, as delegated by and at the discretion of the program director.

265		
266	II.A.3.	Qualifications of the program director:
267		
268	II.A.3.a)	must include subspecialty expertise and qualifications
269		acceptable to the Review Committee; and, (Core)
270		
271	II.A.3.a).(1)	The program director must have administrative experience
272		and at least three years of participation as an active faculty
273		member in an ACGME-accredited internal medicine
274		residency or infectious disease fellowship. (Core)
275		
276	II.A.3.b)	must include current certification in the subspecialty for
277		which they are the program director by the American Board
278		of Internal Medicine (ABIM) or by the American Osteopathic
279		Board of Internal Medicine (AOBIM), or subspecialty
280		qualifications that are acceptable to the Review Committee.
281		(Core)
282		
283	II.A.3.b).(1)	The Review Committee only accepts current ABIM or
284		AOBIM certification in infectious disease. (Core)

285 II.A.4. 286 **Program Director Responsibilities** 287 288 The program director must have responsibility, authority, and accountability for: administration and operations; teaching and 289 290 scholarly activity; fellow recruitment and selection, evaluation, and 291 promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. (Core) 292 293 294 II.A.4.a) The program director must: 295 296 II.A.4.a).(1) be a role model of professionalism; (Core) 297 Background and Intent: The program director, as the leader of the program, must serve

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

II.A.4.a).(2)

design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; (Core)

298 299

300

301

302 303

304 305

306

307 308

309 310

311

312

313 314 Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; (Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

II.A.4.a).(4)

develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; (Core)

315 316 317 318	II.A.4.a).(5)	have the authority to approve program faculty members for participation in the fellowship program education at all sites; (Core)
319 320 321 322	II.A.4.a).(6)	have the authority to remove program faculty members from participation in the fellowship program education at all sites; (Core)
323 324 325 326	II.A.4.a).(7)	have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; (Core)

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

327		
328	II.A.4.a).(8)	submit accurate and complete information required
329		and requested by the DIO, GMEC, and ACGME; (Core)
330		
331	II.A.4.a).(9)	provide applicants who are offered an interview with
332		information related to the applicant's eligibility for the
333		relevant subspecialty board examination(s); (Core)
334		
335	II.A.4.a).(10)	provide a learning and working environment in which
336		fellows have the opportunity to raise concerns and
337		provide feedback in a confidential manner as
338		appropriate, without fear of intimidation or retaliation;
339		(Core)
340		
341	II.A.4.a).(11)	ensure the program's compliance with the Sponsoring
342		Institution's policies and procedures related to
343		grievances and due process; (Core)
344		
345	II.A.4.a).(12)	ensure the program's compliance with the Sponsoring
346		Institution's policies and procedures for due process
347		when action is taken to suspend or dismiss, not to
348		promote, or not to renew the appointment of a fellow;
349		(Core)
350		

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

352 353	II.A.4.a).(13)	ensure the program's compliance with the Sponsoring Institution's policies and procedures on employment
354		and non-discrimination; (Core)
355		
356	II.A.4.a).(13).(a)	Fellows must not be required to sign a non-
357		competition guarantee or restrictive covenant.
358		(Core)
359		
360	II.A.4.a).(14)	document verification of program completion for all
361		graduating fellows within 30 days; (Core)
362		
363	II.A.4.a).(15)	provide verification of an individual fellow's
364		completion upon the fellow's request, within 30 days;
365		and, ^(Core)
366		

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

II.A.4.a).(16)

obtain review and approval of the Sponsoring Institution's DIO before submitting information or requests to the ACGME, as required in the Institutional Requirements and outlined in the ACGME Program **Director's Guide to the Common Program** Requirements. (Core)

II.B.

Faculty members are a foundational element of graduate medical education - faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and

themselves.

Faculty

397

Background and Intent: "Faculty" refers to the entire teaching force responsible for educating fellows. The term "faculty," including "core faculty," does not imply or require an academic appointment.

398 399

400

II.B.1.	For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. (Core)
II.B.2.	Faculty members must:

401 402 403

404 405

be role models of professionalism; (Core) II.B.2.a)

406 407

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; (Core)

408 409

> Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

410

•		
411	II.B.2.c)	demonstrate a strong interest in the education of fellows; (Core)
412		-
413	II.B.2.d)	devote sufficient time to the educational program to fulfill
414	•	their supervisory and teaching responsibilities; (Core)
415		,
416	II.B.2.e)	administer and maintain an educational environment
417	,	conducive to educating fellows; (Core)
418		9 ,
419	II.B.2.f)	regularly participate in organized clinical discussions,
420	,	rounds, journal clubs, and conferences; and, (Core)
421		ioaniao, joannai olabo, ana oomolohooo, ana,
422	II.B.2.g)	pursue faculty development designed to enhance their skills

at least annually. (Core)

423 424

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

425

II.B.3. **Faculty Qualifications**

426 427 428

II.B.3.a) Faculty members must have appropriate qualifications in their field and hold appropriate institutional appointments.

II.B.3.b)	Subspecialty physician faculty members must:
II.B.3.b).(1)	have current certification in the subspecialty by the
	American Board of Internal Medicine or the American
	Osteopathic Board of Internal Medicine, or possess
	qualifications judged acceptable to the Review
	Committee. (Core)
II.B.3.c)	Any non-physician faculty members who participate in
•	fellowship program education must be approved by the
	program director. ^(Core)
	. •
	, , ,

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

II.B.3.d)

Any other specialty physician faculty members must have current certification in their specialty by the appropriate American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board, or possess qualifications judged acceptable to the Review Committee. (Core)

II.B.4. Core Faculty

Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. (Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

460		
461	II.B.4.a)	Core faculty members must be designated by the program
462		director. (Core)
463		
464	II.B.4.b)	Core faculty members must complete the annual ACGME
465	-	Faculty Survey. (Core)
466		,
467	II.B.4.c)	In addition to the program director, there must be at least one core
468	2	faculty member certified in infectious disease by the ABIM or the
469		AOBIM. (Core)
470		AODIW. V
	II D 4 -I)	la management and an allower the same through the same th
471	II.B.4.d)	In programs approved for more than three fellows, there must be
472		at least one core faculty member certified in infectious disease by
473		the ABIM or the AOBIM for every 1.5 fellows. (Core)
474		
475	II.B.4.e)	At a minimum, the required core faculty members, in aggregate
476		and excluding members of the program leadership, must be
477		provided with support equal to an average dedicated minimum of
478		.1 FTE for educational and administrative responsibilities that do
479		not involve direct patient care. (Core)
480		not involve an out patient date.
+00		

Specialty Background and Intent: The program must have a minimum number of ABIM-or AOBIM-certified infectious disease faculty members who devote significant time to teaching, supervising, and advising residents, and working closely with the program director. One way the infectious disease-certified faculty members can demonstrate they are devoting a significant portion of their effort to resident education is by dedicating an average of 10 hours per week to the program.

481

400

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have a minimum of eight ABIM- or AOBIM-subspecialty-certified faculty members and an FTE of 10 percent each. Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE.

483	II.C.	Program Coordinator
484	_	
485	II.C.1.	There must be a program coordinator. (Core)
486		
487	II.C.2.	The program coordinator must be provided with support adequate
488		for administration of the program based upon its size and
489		configuration. ^(Core)
490		
491	II.C.2.a)	At a minimum, the program coordinator must be provided with the
492		dedicated time and support specified below for administration of
493		the program. Additional administrative support must be provided
494		based on the program size as follows: (Core)
495		

Number of Approved Fellow Positions	Minimum FTE Required for Coordinator Support	Additional Aggregate FTE Required for Administration of the Program
<u>1-3</u>	<u>.3</u>	<u> </u>
<u>4-6</u>	<u>.3</u>	<u>.2</u>
<u>7-9</u>	<u>.3</u>	<u>.38</u>
<u>10-12</u>	<u>.3</u>	<u>.44</u>
<u>13-15</u>	<u>.3</u>	<u>.50</u>
<u>16-18</u>	<u>.3</u>	<u>.56</u>
<u>19-21</u>	<u>.3</u>	<u>.62</u>
<u>22-24</u>	<u>.3</u>	<u>.68</u>
<u>25-27</u>	<u>.3</u>	<u>.74</u>

496

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

497

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 74 percent FTE administrative support: 30 percent FTE for the program coordinator; and an additional 44 percent FTE aggregate support. This additional support may be for the program coordinator only or divided among the program coordinator and one or more other administrative personnel. The Review Committee has not specified how the FTE should be distributed to allow programs, in partnership with their Sponsoring Institution, to allocate the FTE as they see fit.

498 499

II.D. Other Program Personnel

500 501 502

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. (Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

505 506 507

There must be services available from other health care professionals. including dietitians, language interpreters, nurses, occupational therapists, physical therapists, and social workers. (Detail)

There must be appropriate and timely consultation from other specialties. (Detail)

III. **Fellow Appointments**

Eligibility Criteria

Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada. (Core)

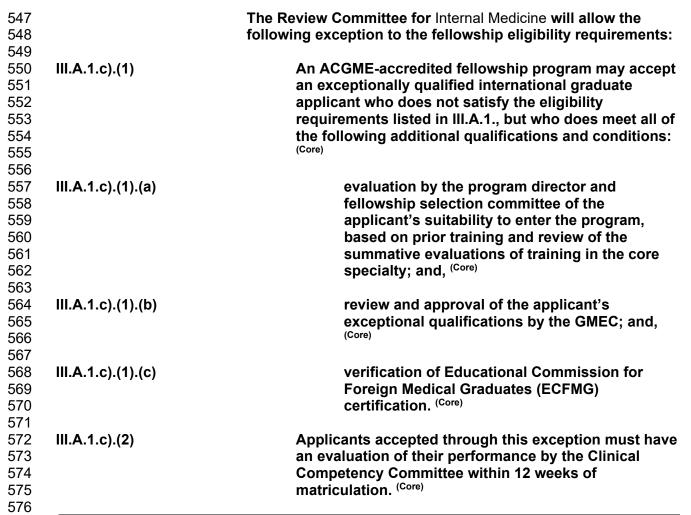

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

> Fellowship programs must receive verification of each entering fellow's level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. (Core)

Prior to appointment in the fellowship, fellows should have completed an internal medicine program that satisfies the requirements in III.A.1. (Core)

> Fellows who did not complete an internal medicine program that satisfies the requirements in III.A.1. must have completed at least three years of internal medicine education prior to starting the fellowship as well as met all of the criteria in the "Fellow Eligibility Exception" section below. (Core)

Fellow Eligibility Exception

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

III.B. The program director must not appoint more fellows than approved by the Review Committee. (Core)

577 578

581 III.B.1. All complement increases must be approved by the Review Committee. (Core) 582 583 584 III.B.2. The number of available fellow positions in the program must be at least one per year. (Detail) 585 586 587 III.C. **Fellow Transfers** 588 589 The program must obtain verification of previous educational experiences 590 and a summative competency-based performance evaluation prior to 591 acceptance of a transferring fellow, and Milestones evaluations upon matriculation (Core) 592 593 IV. 594 **Educational Program** 595 596 The ACGME accreditation system is designed to encourage excellence and 597 innovation in graduate medical education regardless of the organizational 598 affiliation, size, or location of the program. 599 600 The educational program must support the development of knowledgeable, skillful 601 physicians who provide compassionate care. 602 603 In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community 604 it serves and that its graduates will serve, and the distinctive capabilities of 605 606 physicians it intends to graduate. While programs must demonstrate substantial 607 compliance with the Common and subspecialty-specific Program Requirements, it 608 is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims 609 will reflect the nuanced program-specific goals for it and its graduates; for 610 611 example, it is expected that a program aiming to prepare physician-scientists will 612 have a different curriculum from one focusing on community health. 613 614 IV.A. The curriculum must contain the following educational components: (Core) 615 616 IV.A.1. a set of program aims consistent with the Sponsoring Institution's 617 mission, the needs of the community it serves, and the desired distinctive capabilities of its graduates; (Core) 618 619 620 The program's aims must be made available to program IV.A.1.a) 621 applicants, fellows, and faculty members. (Core) 622 623 IV.A.2. competency-based goals and objectives for each educational 624 experience designed to promote progress on a trajectory to 625 autonomous practice in their subspecialty. These must be 626 distributed, reviewed, and available to fellows and faculty members; (Core) 627 628 629 IV.A.3. delineation of fellow responsibilities for patient care, progressive 630 responsibility for patient management, and graded supervision in their subspecialty: (Core) 631

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

IV.A.4. structured educational activities beyond direct patient care; and,

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

IV.A.5. advancement of fellows' knowledge of ethical principles foundational to medical professionalism. (Core)

IV.B. ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: (Core)

IV.B.1.a) Professionalism

IV.D. I.a) Professionalism

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. (Core)

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s Crossing the Quality Chasm: A New Health System for the 21st Century, 2001 and Berwick D, Nolan T, Whittington J. The Triple Aim: care, cost, and quality. Health Affairs. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

4 5 6 7 8 9	IV.B.1.b).(1)	Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. (Core)
9 0 1 2 3 4 5	IV.B.1.b).(1).(a)	Fellows must demonstrate competence in the practice of health promotion, disease prevention, diagnosis, care, and treatment of patients of each gender from adolescence to old age, during health and all stages of illness; and, (Core)
6 7 8 9	IV.B.1.b).(1).(b)	Fellows must demonstrate competence in the diagnosis and management of the following infectious disease areas:
9 0 1	IV.B.1.b).(1).(b).(i)	bacterial infections; (Core)
2 3	IV.B.1.b).(1).(b).(ii)	fungal infections; (Core)
4 5	IV.B.1.b).(1).(b).(iii)	health care-associated infections; (Core)
6 7	IV.B.1.b).(1).(b).(iv)	HIV/AIDS; (Core)
8 9 0	IV.B.1.b).(1).(b).(v)	infections in patients in intensive care units;
1 2 3	IV.B.1.b).(1).(b).(vi)	infections in patients with impaired host defenses; (Core)
4 5	IV.B.1.b).(1).(b).(vii)	infections in surgical patients; (Core)
6 7	IV.B.1.b).(1).(b).(viii)	infections in travelers; (Core)
8 9	IV.B.1.b).(1).(b).(ix)	parasitic infections; (Core)

2 3	IV.B.1.b).(1).(b).(xi)	sepsis syndromes; (Core)
4 5	IV.B.1.b).(1).(b).(xii)	sexually transmitted infections; and, (Core)
6 7	IV.B.1.b).(1).(b).(xiii)	viral infections. (Core)
8 9 0 1	IV.B.1.b).(2)	Fellows must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. (Core)

702	IV.B.1.c)	Medical Knowledge
703 704 705 706 707 708		Fellows must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. (Core)
709 710 711 712	IV.B.1.c).(1)	Fellows must demonstrate knowledge of the scientific method of problem solving and evidence-based decision making; (Core)
713 714 715 716 717 718 719	IV.B.1.c).(2)	Fellows must demonstrate knowledge of indications, contraindications, limitations, complications, techniques, and interpretation of results of those diagnostic and therapeutic procedures integral to the discipline, including the appropriate indications for and use of screening tests/procedures; (Core)
720	IV.B.1.c).(3)	Fellows must demonstrate knowledge of:
721 722 723 724 725 726	IV.B.1.c).(3).(a)	the mechanisms of action and adverse reactions of antimicrobial agents, antimicrobial and antiviral resistance, drug-drug interactions between antimicrobial agents and other compounds; (Core)
727 728 729 730 731	IV.B.1.c).(3).(b)	the appropriate use and management of antimicrobial agents in a variety of clinical settings, including the hospital, ambulatory practice, non-acute-care units, and the home; (Core)
732 733 734 735 736 737	IV.B.1.c).(3).(c)	the appropriate procedures for specimen collection relevant to infectious disease, including but not limited to bronchoscopy, thoracentesis, arthrocentesis, lumbar puncture, and aspiration of abscess cavities; (Core)
738 739 740 741 742 743 744 745 746 747	IV.B.1.c).(3).(d)	the principles of prophylaxis and immunoprophylaxis to enhance resistance to infection; (Core)
	IV.B.1.c).(3).(e)	the characteristics, use, and complications of antiretroviral agents, mechanisms and clinical significance of viral resistance to antiretroviral agents, and recognition and management of opportunistic infections in patients with HIV/AIDS; and, (Core)
748 749 750 751	IV.B.1.c).(3).(f)	the fundamentals of host defense and mechanisms of microorganism pathogenesis. (Core)
752	IV.B.1.c).(4)	Fellows must demonstrate knowledge of the development

753 of appropriate antibiotic utilizations and restriction policies; and, (Core) 754 755 756 IV.B.1.c).(5) Fellows must demonstrate knowledge of infection control and hospital epidemiology. (Core) 757 758 759 IV.B.1.d) **Practice-based Learning and Improvement** 760 761 Fellows must demonstrate the ability to investigate and 762 evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care 763 764 based on constant self-evaluation and lifelong learning. (Core) 765 Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship. 766 n d

700		
767	IV.B.1.e)	Interpersonal and Communication Skills
768		
769		Fellows must demonstrate interpersonal and communication
770		skills that result in the effective exchange of information and
771		collaboration with patients, their families, and health
772		professionals. (Core)
773	D/D 4 0	
774	IV.B.1.f)	Systems-based Practice
775		
776		Fellows must demonstrate an awareness of and
777		responsiveness to the larger context and system of health
778		care, including the social determinants of health, as well as
779		the ability to call effectively on other resources to provide
780		optimal health care. ^(Core)

782	IV.C.	Curriculum Organization and Fellow Experiences
783	11/04	
784 785	IV.C.1.	The curriculum must be structured to optimize fellow educational
786		experiences, the length of these experiences, and supervisory continuity. (Core)
787		Continuity.
788	IV C 1 a)	Assignment of rotations must be structured to minimize the
789	IV.C.1.a)	Assignment of rotations must be structured to minimize the frequency of rotational transitions, and rotations must be of
790		sufficient length to provide a quality educational experience,
791		defined by continuity of patient care, ongoing supervision,
792		longitudinal relationships with faculty members, and meaningful
793		assessment and feedback. (Core)
794		assessment and recupacit.
1 5 -		

795 796 797 798 799	IV.C.1.b)	Clinical experiences should be structured to facilitate learning in a manner that allows fellows to function as part of an effective interprofessional team that works together towards the shared goals of patient safety and quality improvement. (Core)
800 801 802 803	IV.C.2.	The program must provide instruction and experience in pain management if applicable for the subspecialty, including recognition of the signs of addiction. (Core)
804 805	IV.C.3.	A minimum of 12 months must be devoted to clinical experience. (Core)
806 807 808 809	IV.C.4.	Fellows must participate in the management of outpatient antibiotic therapy, including interaction with pharmacy, nursing, and other home care services. (Core)
810 811	IV.C.5.	Fellows must participate in training using simulation. (Detail)
812 813	IV.C.6.	Experience with Continuity Ambulatory Patients
814 815 816 817	IV.C.6.a)	Fellows must have continuity ambulatory clinic experience that exposes them fellows to the breadth and depth of the subspecialty. (Core)
818 819	IV.C.6.b)	This experience should average one half-day each week. (Detail)
820 821 822	IV.C.6.c)	This experience must include an appropriate distribution of patients of each gender and a diversity of ages; (Core)
823 824		This should be accomplished through either:
825 826 827	IV.C.6.c).(1)	a continuity clinic which provides fellows the opportunity to learn the course of disease; or, (Detail)
828 829 830	IV.C.6.c).(2)	selected blocks of at least six months which address specific areas of infectious disease. (Detail)
831 832 833 834	IV.C.6.d)	Ambulatory experience must include the longitudinal care of patients with HIV infection under the supervision of a physician experienced in the management of HIV infection. (Core)
835 836 837	IV.C.6.d).(1)	Fellows must be assigned to an HIV clinic for a period of at least 12 months. (Detail)
838 839 840	IV.C.6.e)	Each fellow should, on average, be responsible for four to eight patients during each half-day session. (Detail)
841 842 843	IV.C.6.f)	The continuity patient care experience should not be interrupted by more than one month, excluding a fellow's vacation. (Detail)
844 845	IV.C.6.g)	Fellows should be informed of the status of their continuity patients when such patients are hospitalized, as clinically

846 847		appropriate. (Detail)
848 849	IV.C.7.	Consultations
850 851 852 853 854	IV.C.7.a)	Each fellow must provide patient care consultations or directly oversee students or residents performing consultations totaling at least 250 new patient consults with infectious disease problems. (Core)
855 856	IV.C.7.b)	Experience with pediatric infectious diseases is suggested. (Detail)
857 858 859	IV.C.8.	The core curriculum must include a didactic program based upon the core knowledge content in the subspecialty area. (Core)
860 861 862 863	IV.C.8.a)	The program must afford each fellow an opportunity to review topics covered in conferences that he or she was unable to attend. (Detail)
864 865 866 867	IV.C.8.b)	Fellows must participate in clinical case conferences, journal clubs, research conferences, and morbidity and mortality or quality improvement conferences. (Detail)
868 869 870 871	IV.C.8.c)	All core conferences must have at least one faculty member present, and must be scheduled as to ensure peer-peer and peer-faculty interaction. (Detail)
872 873 874 875 876	IV.C.9.	Patient-based teaching must include direct interaction between fellows and faculty members, bedside teaching, discussion of pathophysiology, and the use of current evidence in diagnostic and therapeutic decisions. (Core)
877 878		The teaching must be:
879 880 881	IV.C.9.a)	formally conducted on all inpatient, outpatient, and consultative services; and, $^{(\mbox{\scriptsize Detail})}$
882 883 884 885	IV.C.9.b)	conducted with a frequency and duration that ensures a meaningful and continuous teaching relationship between the assigned supervising faculty member(s) and fellows. (Detail)
886 887 888	IV.C.10.	Fellows must receive instruction in practice management relevant to infectious disease. (Detail)
889 890	IV.D.	Scholarship
891 892 893 894 895 896		Medicine is both an art and a science. The physician is a humanistic scientist who cares for patients. This requires the ability to think critically, evaluate the literature, appropriately assimilate new knowledge, and practice lifelong learning. The program and faculty must create an environment that fosters the acquisition of such skills through fellow participation in scholarly activities as defined in the subspecialty-specific

897 898		Program Requirements. Scholarly activities may include discovery, integration, application, and teaching.
900 901 902 903 904 905 906 907		The ACGME recognizes the diversity of fellowships and anticipates that programs prepare physicians for a variety of roles, including clinicians, scientists, and educators. It is expected that the program's scholarship will reflect its mission(s) and aims, and the needs of the community it serves. For example, some programs may concentrate their scholarly activity on quality improvement, population health, and/or teaching, while other programs might choose to utilize more classic forms of biomedical research as the focus for scholarship.
908 909 910	IV.D.1.	Program Responsibilities
911 912 913	IV.D.1.a)	The program must demonstrate evidence of scholarly activities, consistent with its mission(s) and aims. (Core)
914 915 916 917	IV.D.1.b)	The program in partnership with its Sponsoring Institution, must allocate adequate resources to facilitate fellow and faculty involvement in scholarly activities. (Core)
917 918 919	IV.D.2.	Faculty Scholarly Activity
920 921 922 923	IV.D.2.a)	Among their scholarly activity, programs must demonstrate accomplishments in at least three of the following domains:
924 925		Research in basic science, education, translational science, patient care, or population health
926 927 928 929 930 931 932		 Peer-reviewed grants Quality improvement and/or patient safety initiatives Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials
933 934 935 936		 Contribution to professional committees, educational organizations, or editorial boards Innovations in education
937 938 939	IV.D.2.b)	The program must demonstrate dissemination of scholarly activity within and external to the program by the following methods:
940		

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the fellows' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the

creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

faculty participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peerreviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a iournal reviewer, journal editorial board member, or editor; (Outcome)‡

At least 50 percent of the core faculty members who are certified in infectious disease by the ABIM or AOBIM (see Program Requirements II.B.4.c)-d) must annually engage in a variety of scholarly activities, as listed in Program Requirement IV.D.2.b).(1). (Core)

Fellow Scholarly Activity

IV.D.3.a)

While in the program, at least 50 percent of a program's fellows must engage in more than one of the following scholarly activities: participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor. (Outcome)

V. **Evaluation**

V.A. **Fellow Evaluation**

V.A.1. **Feedback and Evaluation**

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and selfreflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is monitoring fellow learning and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is evaluating a fellow's learning by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

976 977 978 979	V.A.1.a)	Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. (Core)
980 981 982	V.A.1.a).(1)	The faculty must discuss this evaluation with each fellow at the completion of each assignment. (Core)
983 984 985 986	V.A.1.a).(2)	Assessment of procedural competence should include a formal evaluation process and not be based solely on a minimum number of procedures performed. (Detail)

975

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

987		
988	V.A.1.b)	Evaluation must be documented at the completion of the
989		assignment. (Core)
990		
991	V.A.1.b).(1)	For block rotations of greater than three months in
992		duration, evaluation must be documented at least
993		every three months. (Core)
994		•
995	V.A.1.b).(2)	Longitudinal experiences such as continuity clinic in
996		the context of other clinical responsibilities must be
997		evaluated at least every three months and at
998		completion. (Core)
999		
1000	V.A.1.c)	The program must provide an objective performance
1001	•	evaluation based on the Competencies and the subspecialty-
1002		specific Milestones, and must: (Core)
1003		
998 999 1000 1001 1002	V.A.1.c)	completion. (Core) The program must provide an objective performance evaluation based on the Competencies and the subspecialty

1004 1005 1006	V.A.1.c).(1)	use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, (Core)
1007		
1008	V.A.1.c).(2)	provide that information to the Clinical Competency
1009		Committee for its synthesis of progressive fellow
1010		performance and improvement toward unsupervised
1011		practice. (Core)
1012		

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

1013		
1014	V.A.1.d)	The program director or their designee, with input from the
1015		Clinical Competency Committee, must:
1016		
1017	V.A.1.d).(1)	meet with and review with each fellow their
1018		documented semi-annual evaluation of performance,
1019		including progress along the subspecialty-specific
1020		Milestones. (Core)
1021		
1022	V.A.1.d).(2)	assist fellows in developing individualized learning
1023		plans to capitalize on their strengths and identify areas
1024		for growth; and, ^(Core)
1025		
1026	V.A.1.d).(3)	develop plans for fellows failing to progress, following
1027		institutional policies and procedures. ^(Core)

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow

progression. To ensure due process, it is essential that the program director follow
institutional policies and procedures.

4000	institutional policies and procedures.		
1029 1030 1031 1032	V.A.1.e)	At least annually, there must be a summative evaluation of each fellow that includes their readiness to progress to the next year of the program, if applicable. (Core)	
1033 1034 1035 1036	V.A.1.f)	The evaluations of a fellow's performance must be accessible for review by the fellow. (Core)	
1037 1038	V.A.2.	Final Evaluation	
1039 1040 1041	V.A.2.a)	The program director must provide a final evaluation for each fellow upon completion of the program. (Core)	
1042 1043 1044 1045 1046 1047	V.A.2.a).(1)	The subspecialty-specific Milestones, and when applicable the subspecialty-specific Case Logs, must be used as tools to ensure fellows are able to engage in autonomous practice upon completion of the program. (Core)	
1048 1049	V.A.2.a).(2)	The final evaluation must:	
1050 1051 1052 1053 1054	V.A.2.a).(2).(a)	become part of the fellow's permanent record maintained by the institution, and must be accessible for review by the fellow in accordance with institutional policy; (Core)	
1055 1056 1057 1058	V.A.2.a).(2).(b)	verify that the fellow has demonstrated the knowledge, skills, and behaviors necessary to enter autonomous practice; (Core)	
1059 1060 1061	V.A.2.a).(2).(c)	consider recommendations from the Clinical Competency Committee; and, (Core)	
1062 1063 1064	V.A.2.a).(2).(d)	be shared with the fellow upon completion of the program. ^(Core)	
1065 1066 1067	V.A.3.	A Clinical Competency Committee must be appointed by the program director. (Core)	
1068 1069 1070 1071 1072 1073	V.A.3.a)	At a minimum the Clinical Competency Committee must include three members, at least one of whom is a core faculty member. Members must be faculty members from the same program or other programs, or other health professionals who have extensive contact and experience with the program's fellows. (Core)	
1075 1076	V.A.3.b)	The Clinical Competency Committee must:	

1077	V.A.3.b).(1)		review all fellow evaluations at least semi-annually;
1078			(Core)
1079			
1080	V.A.3.b).(2)		determine each fellow's progress on achievement of
1081	, , ,		the subspecialty-specific Milestones; and, (Core)
1082			
1083	V.A.3.b).(3)		meet prior to the fellows' semi-annual evaluations and
1084	, , ,		advise the program director regarding each fellow's
1085			progress. (Core)
1086			. •
1087	V.B.	Faculty Evaluation	
1088		•	
1089	V.B.1.	The program	must have a process to evaluate each faculty
1090		member's per	formance as it relates to the educational program at
1091		least annually	
1092		153.50 4111144119	•
1002			

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1093		
1094	V.B.1.a)	This evaluation must include a review of the faculty member's
1095		clinical teaching abilities, engagement with the educational
1096		program, participation in faculty development related to their
1097		skills as an educator, clinical performance, professionalism,
1098		and scholarly activities. (Core)
1099		
1100	V.B.1.b)	This evaluation must include written, confidential evaluations
1101		by the fellows. (Core)
1102		·
1103	V.B.2.	Faculty members must receive feedback on their evaluations at least
1104		annually. ^(Core)
1105		·
1106	V.B.3.	Results of the faculty educational evaluations should be
1107		incorporated into program-wide faculty development plans. (Core)
-		incorporated into program-wide faculty development plans.
1108		

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1100

1109		
1110	V.C.	Program Evaluation and Improvement
1111		
1112	V.C.1.	The program director must appoint the Program Evaluation
1113		Committee to conduct and document the Annual Program
1114		Evaluation as part of the program's continuous improvement
1115		process. (Core)
1116		
1117	V.C.1.a)	The Program Evaluation Committee must be composed of at
1118		least two program faculty members, at least one of whom is a
1119		core faculty member, and at least one fellow. (Core)
1120		
1121	V.C.1.b)	Program Evaluation Committee responsibilities must include:
1122		
1123	V.C.1.b).(1)	acting as an advisor to the program director, through
1124		program oversight; ^(Core)
1125		
1126	V.C.1.b).(2)	review of the program's self-determined goals and
1127		progress toward meeting them; (Core)
1128		
1129	V.C.1.b).(3)	guiding ongoing program improvement, including
1130		development of new goals, based upon outcomes;
1131		and, ^(Core)
1132		
1133	V.C.1.b).(4)	review of the current operating environment to identify
1134		strengths, challenges, opportunities, and threats as
1135		related to the program's mission and aims. ^(Core)
1136		

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

1137		
1138	V.C.1.c)	The Program Evaluation Committee should consider the
1139		following elements in its assessment of the program:
1140		
1141	V.C.1.c).(1)	curriculum; ^(Core)
1142		
1143	V.C.1.c).(2)	outcomes from prior Annual Program Evaluation(s);

1188		improvement, and threats. (Core)
1189		
1190	V.C.1.e)	The annual review, including the action plan, must:
1191	V O 4 a) (4)	
1192 1193	V.C.1.e).(1)	be distributed to and discussed with the members of the teaching faculty and the fellows; and, (Core)
1193		the teaching faculty and the lenows, and, (1997)
1194	V.C.1.e).(2)	be submitted to the DIO. (Core)
1196	1.0.1.0).(2)	be submitted to the bio.
1197	V.C.2.	The program must participate in a Self-Study prior to its 10-Year
1198		Accreditation Site Visit. (Core)
-		

1199	
1200	V.C.2.a)
1201	

1202

1203

A summary of the Self-Study must be submitted to the DIO. (Core)

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the ACGME Manual of Policies and Procedures. Additionally, a description of the Self-Study process, as well as information on how to prepare for the 10-Year Accreditation Site Visit, is available on the ACGME website.

1203		
1204	V.C.3.	One goal of ACGME-accredited education is to educate physicians
1205		who seek and achieve board certification. One measure of the
1206		effectiveness of the educational program is the ultimate pass rate.
1207		
1208		The program director should encourage all eligible program
1209		graduates to take the certifying examination offered by the
1210		applicable American Board of Medical Specialties (ABMS) member
1211		board or American Osteopathic Association (AOA) certifying board.
1212		board of American Osteopatine Association (AOA) certifying board.
1213	V.C.3.a)	For subspecialties in which the ABMS member board and/or
1213	v.c.s.a)	AOA certifying board offer(s) an annual written exam, in the
1214		
		preceding three years, the program's aggregate pass rate of
1216		those taking the examination for the first time must be higher
1217		than the bottom fifth percentile of programs in that
1218		subspecialty. (Outcome)
1219		
1220	V.C.3.b)	For subspecialties in which the ABMS member board and/or
1221		AOA certifying board offer(s) a biennial written exam, in the
1222		preceding six years, the program's aggregate pass rate of
1223		those taking the examination for the first time must be higher
1224		than the bottom fifth percentile of programs in that
1225		subspecialty. (Outcome)
1226		
1227	V.C.3.c)	For subspecialties in which the ABMS member board and/or
1228		AOA certifying board offer(s) an annual oral exam, in the
1229		preceding three years, the program's aggregate pass rate of
1230		those taking the examination for the first time must be higher
1231		than the bottom fifth percentile of programs in that
1232		subspecialty. (Outcome)
1233		-
1234	V.C.3.d)	For subspecialties in which the ABMS member board and/or
1235	,	AOA certifying board offer(s) a biennial oral exam, in the
1236		preceding six years, the program's aggregate pass rate of
1237		those taking the examination for the first time must be higher

1238 than the bottom fifth percentile of programs in that subspecialty. (Outcome) 1239 1240 1241 V.C.3.e) For each of the exams referenced in V.C.3.a)-d), any program 1242 whose graduates over the time period specified in the 1243 requirement have achieved an 80 percent pass rate will have 1244 met this requirement, no matter the percentile rank of the program for pass rate in that subspecialty. (Outcome) 1245 1246

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1248 V.C.3.f)

1247

1249

1250

1251

Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier. (Core)

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

VI. The Learning and Working Environment

> Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- Excellence in the safety and quality of care rendered to patients by fellows today
- Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice

1252 1253

1254 1255

1256 1257 1258

1259 1260 1261

- Excellence in professionalism through faculty modeling of:
 - the effacement of self-interest in a humanistic environment that supports the professional development of physicians
 - o the joy of curiosity, problem-solving, intellectual rigor, and discovery
- Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an

1291		active role in system improvement processes. Graduating fellows
1292		will apply these skills to critique their future unsupervised practice
1293		and effect quality improvement measures.
1294		, , , , , , , , , , , , , , , , , , ,
1295		It is necessary for fellows and faculty members to consistently work
1296		in a well-coordinated manner with other health care professionals to
		<u>•</u>
1297		achieve organizational patient safety goals.
1298

1412	\ <i>U</i>	
1413	VI.A.2.	Supervision and Accountability
1414	\/I A O =\	
1415	VI.A.2.a)	Although the attending physician is ultimately responsible for
1416 1417		the care of the patient, every physician shares in the
1417		responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with
1419		their Sponsoring Institutions, define, widely communicate,
1420		and monitor a structured chain of responsibility and
1421		accountability as it relates to the supervision of all patient
1422		care.
1423		our c.
1424		Supervision in the setting of graduate medical education
1425		provides safe and effective care to patients; ensures each
1426		fellow's development of the skills, knowledge, and attitudes
1427		required to enter the unsupervised practice of medicine; and
1428		establishes a foundation for continued professional growth.
1429		,
1430	VI.A.2.a).(1)	Each patient must have an identifiable and
1431		appropriately-credentialed and privileged attending
1432		physician (or licensed independent practitioner as
1433		specified by the applicable Review Committee) who is
1434		responsible and accountable for the patient's care.
1435		(Core)
1436		
1437	VI.A.2.a).(1).(a)	This information must be available to fellows,
1438		faculty members, other members of the health
1439		care team, and patients. ^(Core)
1440		

1441	VI.A.2.a).(1).(b)	Fellows and faculty members must inform each
1442		patient of their respective roles in that patient's
1443		care when providing direct patient care. (Core)
1444		
1445	VI.A.2.b)	Supervision may be exercised through a variety of methods.
1446		For many aspects of patient care, the supervising physician
1447		may be a more advanced fellow. Other portions of care
1448		provided by the fellow can be adequately supervised by the
1449		appropriate availability of the supervising faculty member or
1450		fellow, either on site or by means of telecommunication
1451		technology. Some activities require the physical presence of
1452		the supervising faculty member. In some circumstances,
1453		supervision may include post-hoc review of fellow-delivered
1454		care with feedback.
1455		

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1457 1458 1459 1460 1461 1462 1463	VI.A.2.b).(1)	The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow's level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. (Core)
1464 1465 1466	VI.A.2.b).(2)	The program must define when physical presence of a supervising physician is required. (Core)
1467 1468 1469 1470 1471	VI.A.2.c)	Levels of Supervision To promote appropriate fellow supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: (Core)
1472 1473 1474	VI.A.2.c).(1)	Direct Supervision:
1475 1476 1477 1478	VI.A.2.c).(1).(a)	the supervising physician is physically present with the fellow during the key portions of the patient interaction; or, (Core)
1479 1480 1481	VI.A.2.c).(1).(b)	the supervising physician and/or patient is not physically present with the fellow and the supervising physician is concurrently

1527 1528 1529		and to delegate to the fellow the appropriate level of patient care authority and responsibility. (Core)
1525 1526	VI.A.2.f)	Faculty supervision assignments must be of sufficient duration to assess the knowledge and skills of each fellow
1524		Itent: The ACGME Glossary of Terms defines conditional Graded, progressive responsibility for patient care with defined
1519 1520 1521 1522 1523	VI.A.2.e).(1)	Each fellow must know the limits of their scope of authority, and the circumstances under which the fellow is permitted to act with conditional independence. (Outcome)
1515 1516 1517 1518	VI.A.2.e)	Programs must set guidelines for circumstances and events in which fellows must communicate with the supervising faculty member(s). (Core)
1509 1510 1511 1512 1513 1514	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior fellows and residents in recognition of their progress toward independence, based on the needs of each patient and the skills of the individual resident or fellow. (Detail)
1503 1504 1505 1506 1507 1508	VI.A.2.d).(2)	Faculty members functioning as supervising physicians must delegate portions of care to fellows based on the needs of the patient and the skills of each fellow. (Core)
1499 1500 1501 1502 1503	VI.A.2.d).(1)	The program director must evaluate each fellow's abilities based on specific criteria, guided by the Milestones. (Core)
1495 1496 1497 1498	VI.A.2.d)	The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each fellow must be assigned by the program director and faculty members. (Core)
1490 1491 1492 1493 1494	VI.A.2.c).(3)	Oversight – the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. (Core)
1485 1486 1487 1488 1489	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the fellow for guidance and is available to provide appropriate direct supervision. (Core)
1482 1483 1484		monitoring the patient care through appropriate telecommunication technology. (Core)

1530	VI.B.	Professionalism
1531		
1532	VI.B.1.	Programs, in partnership with their Sponsoring Institutions, must
1533		educate fellows and faculty members concerning the professional
1534		responsibilities of physicians, including their obligation to be
1535		appropriately rested and fit to provide the care required by their
1536		patients. (Core)
1537		
1538	VI.B.2.	The learning objectives of the program must:
1539		
1540	VI.B.2.a)	be accomplished through an appropriate blend of supervised
1541		patient care responsibilities, clinical teaching, and didactic
1542		educational events; (Core)
1543		
1544	VI.B.2.b)	be accomplished without excessive reliance on fellows to
1545		fulfill non-physician obligations; and, (Core)
1546		

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1547 1548

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

1549

Background and Intent: The Common Program Requirements do not define "manageable patient care responsibilities" as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1551 1552	VI.B.3.	The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient
1553		safety and personal responsibility. (Core)
1554		• • •
1555	VI.B.4.	Fellows and faculty members must demonstrate an understanding
1556		of their personal role in the:
1557		·
1558	VI.B.4.a)	provision of patient- and family-centered care; (Outcome)
1559	•	
1560	VI.B.4.b)	safety and welfare of patients entrusted to their care,
1561	,	including the ability to report unsafe conditions and adverse
1562		events: (Outcome)

1563

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1564 1565

assurance of their fitness for work, including: (Outcome) VI.B.4.c)

1566

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

	accordance with medicational perioder	
1567		
1568	VI.B.4.c).(1)	management of their time before, during, and after
1569		clinical assignments; and, (Outcome)
1570		·
1571	VI.B.4.c).(2)	recognition of impairment, including from illness,
1572	, , ,	fatigue, and substance use, in themselves, their peers,
1573		and other members of the health care team. (Outcome)
1574		
1575	VI.B.4.d)	commitment to lifelong learning; (Outcome)
1576	•

to patient needs that supersedes self-interest. This includes the recognition that under certain circumstances, the best interests of the patient may be served by transitioning that patient's care to another qualified and rested provider. (Outcome) VI.B.6. Programs, in partnership with their Sponsoring Institutions, must provide a professional, equitable, respectful, and civil environment that is free from discrimination, sexual and other forms of 1591 harassment, mistreatment, abuse, or coercion of students, fellows, faculty, and staff. (Core) VI.B.7. Programs, in partnership with their Sponsoring Institutions, should have a process for education of fellows and faculty regarding unprofessional behavior and a confidential process for reporting, investigating, and addressing such concerns. (Core)

VI.C. Well-Being

> Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require

1604 proactive attention to life inside and outside of medicine. Well-being requires that physicians retain the joy in medicine while managing their 1605 1606 own real-life stresses. Self-care and responsibility to support other 1607 members of the health care team are important components of professionalism; they are also skills that must be modeled, learned, and 1608 1609 nurtured in the context of other aspects of fellowship training. 1610 1611 Fellows and faculty members are at risk for burnout and depression. 1612 1613

1614

1615

1616

1617 1618

1619 1620

1621

Fellows and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: www.acgme.org/physicianwellbeing.

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the <u>Well-Being Tools and Resources page</u> in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

1622		
1623	VI.C.1.	The responsibility of the program, in partnership with the
1624		Sponsoring Institution, to address well-being must include:
1625		
1626	VI.C.1.a)	efforts to enhance the meaning that each fellow finds in the
1627		experience of being a physician, including protecting time
1628		with patients, minimizing non-physician obligations,
1629		providing administrative support, promoting progressive
1630		autonomy and flexibility, and enhancing professional
1631		relationships; (Core)
1632		
1633	VI.C.1.b)	attention to scheduling, work intensity, and work
1634	•	compression that impacts fellow well-being; (Core)
1635		•
1636	VI.C.1.c)	evaluating workplace safety data and addressing the safety of
1637	•	fellows and faculty members; (Core)
1638		•

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

VI.C.1.d)

policies and programs that encourage optimal fellow and faculty member well-being; and, (Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

VI.C.1.d).(1) 1645

Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours.

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

VI.C.

 VI.C.1.e)

attention to fellow and faculty member burnout, depression, and substance use disorder. The program, in partnership with its Sponsoring Institution, must educate faculty members and fellows in identification of the symptoms of burnout, depression, and substance use disorder, including means to assist those who experience these conditions. Fellows and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: (Core)

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available in Learn at ACGME (https://dl.acgme.org/pages/well-being-tools-resources).

VI.C.1.e).(1) 1663

encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence (Core)

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1670 1671 1672 1673	VI.C.1.e).(2)	provide access to appropriate tools for self-screening; and, $^{(\text{Core})}$
1673 1674 1675 1676	VI.C.1.e).(3)	provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24
1677		hours a day, seven days a week. ^(Core)
1678		•

1670

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

	-
VI.C.2.	There are circumstances in which fellows may be unable to attend
	work, including but not limited to fatigue, illness, family
	emergencies, and parental leave. Each program must allow an
	appropriate length of absence for fellows unable to perform their
	patient care responsibilities. (Core)
	·
VI.C.2.a)	The program must have policies and procedures in place to
,	ensure coverage of patient care. (Core)
VI.C.2.b)	These policies must be implemented without fear of negative
,	consequences for the fellow who is or was unable to provide
	the clinical work. ^(Core)

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

1693		
1694	VI.D.	Fatigue Mitigation
1695		
1696	VI.D.1.	Programs must:
1697		
1698	VI.D.1.a)	educate all faculty members and fellows to recognize the
1699		signs of fatigue and sleep deprivation; (Core)
1700		
1701	VI.D.1.b)	educate all faculty members and fellows in alertness
1702		management and fatigue mitigation processes; and, (Core)
1703		
1704	VI.D.1.c)	encourage fellows to use fatigue mitigation processes to
1705		manage the potential negative effects of fatigue on patient
1706		care and learning. (Detail)
1707		

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1700		
1709	VI.D.2.	Each program must ensure continuity of patient care, consistent
1710		with the program's policies and procedures referenced in VI.C.2-
1711		VI.C.2.b), in the event that a fellow may be unable to perform their
1712		patient care responsibilities due to excessive fatigue. (Core)
1713		
1714	VI.D.3.	The program, in partnership with its Sponsoring Institution, must
1715		ensure adequate sleep facilities and safe transportation options for
1716		fellows who may be too fatigued to safely return home. (Core)
1717		
1718	VI.E.	Clinical Responsibilities, Teamwork, and Transitions of Care
1719		
1720	VI.E.1.	Clinical Responsibilities
1721		
1722		The clinical responsibilities for each fellow must be based on PGY
1723		level, patient safety, fellow ability, severity and complexity of patient
1724		illness/condition, and available support services. (Core)
1725		

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty

members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1726

1726		
1727	VI.E.2.	Teamwork
1728		
1729		Fellows must care for patients in an environment that maximizes
1730		communication. This must include the opportunity to work as a
1731		member of effective interprofessional teams that are appropriate to
1732		the delivery of care in the subspecialty and larger health system.
1733		(Core)
1734		
1735	VI.E.3.	Transitions of Care
1736		
1737	VI.E.3.a)	Programs must design clinical assignments to optimize
1738		transitions in patient care, including their safety, frequency,
1739		and structure. (Core)
1740		
1741	VI.E.3.b)	Programs, in partnership with their Sponsoring Institutions,
1742		must ensure and monitor effective, structured hand-over
1743		processes to facilitate both continuity of care and patient
1744		safety. ^(Core)
1745		
1746	VI.E.3.c)	Programs must ensure that fellows are competent in
1747		communicating with team members in the hand-over process.
1748		(Outcome)
1749		
1750	VI.E.3.d)	Programs and clinical sites must maintain and communicate
1751		schedules of attending physicians and fellows currently
1752		responsible for care. (Core)
1753		
1754	VI.E.3.e)	Each program must ensure continuity of patient care,
1755		consistent with the program's policies and procedures
1756		referenced in VI.C.2-VI.C.2.b), in the event that a fellow may
1757		be unable to perform their patient care responsibilities due to
1758 1759		excessive fatigue or illness, or family emergency. (Core)
1759	VI.F.	Clinical Experience and Education
1760	VI.F.	Clinical Experience and Education
1761		Programs in partnership with their Chancering Institutions must design
1762		Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with
1763		educational and clinical experience opportunities, as well as reasonable
1764		opportunities for rest and personal activities.
1765		opportunities for rest and personal activities.
1700		

Background and Intent: In the new requirements, the terms "clinical experience and education," "clinical and educational work," and "clinical and educational work hours" replace the terms "duty hours," "duty periods," and "duty." These changes have been

made in response to concerns that the previous use of the term "duty" in reference to number of hours worked may have led some to conclude that fellows' duty to "clock out" on time superseded their duty to their patients.

Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. (Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

VI.F.1.

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the

following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1//5		
1776	VI.F.2.	Mandatory Time Free of Clinical Work and Education
1777		
1778	VI.F.2.a)	The program must design an effective program structure that
1779	•	is configured to provide fellows with educational
1780		opportunities, as well as reasonable opportunities for rest
1781		and personal well-being. ^(Core)
1782		
1783	VI.F.2.b)	Fellows should have eight hours off between scheduled
1784		clinical work and education periods. (Detail)
1785		
1786	VI.F.2.b).(1)	There may be circumstances when fellows choose to
1787		stay to care for their patients or return to the hospital
1788		with fewer than eight hours free of clinical experience
1789		and education. This must occur within the context of
1790		the 80-hour and the one-day-off-in-seven
1791		requirements. (Detail)
1792		

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1793
1794
VI.F.2.c)
Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. (Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus

1797 1798

1799

1800

1801 1802

1002

1818 1819 Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

VI.F.2.d)

Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1803		
1804	VI.F.3.	Maximum Clinical Work and Education Period Length
1805		
1806	VI.F.3.a)	Clinical and educational work periods for fellows must not
1807		exceed 24 hours of continuous scheduled clinical
1808		assignments. (Core)
1809		•
1810	VI.F.3.a).(1)	Up to four hours of additional time may be used for
1811	, , ,	activities related to patient safety, such as providing
1812		effective transitions of care, and/or fellow education.
1813		(Core)
1814		
1815	VI.F.3.a).(1).(a)	Additional patient care responsibilities must not
1816	, , , , ,	be assigned to a fellow during this time. (Core)
1817		

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

VI.F.4. Clinical and Educational Work Hour Exceptions

1820		
1821	VI.F.4.a)	In rare circumstances, after handing off all other
1822		responsibilities, a fellow, on their own initiative, may elect to
1823		remain or return to the clinical site in the following
1824		circumstances:
1825		
1826	VI.F.4.a).(1)	to continue to provide care to a single severely ill or
1827		unstable patient; (Detail)
1828		
1829	VI.F.4.a).(2)	humanistic attention to the needs of a patient or
1830		family; or, ^(Detail)
1831		
1832	VI.F.4.a).(3)	to attend unique educational events. (Detail)
1833		
1834	VI.F.4.b)	These additional hours of care or education will be counted
1835		toward the 80-hour weekly limit. (Detail)
1836		

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

VI.F.4.c)	A Review Committee may grant rotation-specific exceptions
VI.I .4.0)	for up to 10 percent or a maximum of 88 clinical and
	educational work hours to individual programs based on a
	sound educational rationale.
	The Review Committee for Internal Medicine will not consider
	requests for exceptions to the 80-hour limit to the fellows' work
	week.
VI.F.5.	Moonlighting
VI.F.5.a)	Moonlighting must not interfere with the ability of the fellow
	to achieve the goals and objectives of the educational
	program, and must not interfere with the fellow's fitness for
	work nor compromise patient safety. (Core)
VI.F.5.b)	Time spent by fellows in internal and external moonlighting
	(as defined in the ACGME Glossary of Terms) must be
	counted toward the 80-hour maximum weekly limit. (Core)

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements).

VI.F.6.	In-House Night Float	
	Night float must occur within the context of the 80-hour and one-day-off-in-seven requirements. (Core)	
	d Intent: The requirement for no more than six consecutive nights of removed to provide programs with increased flexibility in scheduling.	
VI.F.7.	Maximum In-House On-Call Frequency	
	Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). (Core)	
VI.F.7.a)	Internal Medicine fellowships must not average in-house call over a four-week period. (Core)	
VI.F.8.	At-Home Call	
VI.F.8.a)	Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the everythird-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. (Core)	
VI.F.8.a).(1)	At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow. (Core)	
VI.F.8.b)	Fellows are permitted to return to the hospital while on athome call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. (Detail)	

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
